

Alex Luncan

ICT SPECIALIST - INTERNAL TOOLS & AUTOMATION.

Profile

Highly motivated ICT specialist and software engineer with a background in C#, PHP, SQL and systems administration. Experienced in building internal tools, web and mobile applications, and Power Platform solutions that automate real business processes. Comfortable working across the stack, from databases and infrastructure (Active Directory, Windows Server, Fortinet) to front-end interfaces in Flutter, Unity, and Power Apps. Currently focusing on cloud and AI-related skills (AWS, Microsoft) and eager to support Themis with scalable, secure, and data-driven digital solutions.

Employment History

Human Resources Staffing Coordinator, Themis B.V., Roosendaal, North Brabant, Netherlands

JUL 2025 – PRESENT

- Manage the full lifecycle of temporary workforce assignments, from hiring decisions and onboarding to scheduling, coaching and (when needed) termination.
- Act as single point of contact for clients, forecasting headcount, keeping operations staffed, and maintaining compliance while treating people fairly.
- In parallel, drive ICT initiatives such as designing and implementing internal tools (e.g. Power Platform apps, dataflows, and reporting) to optimise planning and reduce manual work.

Inventory Controller, GXO Logistics, Inc., Heerlen, Limburg, Netherlands

APR 2024 – MAR 2025

- Conducted regular cycle counts and root-cause analysis to ensure inventory accuracy and maintain proper stock levels.
- Used data from WMS and Excel to update product information, monitor ageing stock and support inventory-related decision making.
- Collaborated with operations and planning teams to improve picking, packing and storage efficiency while reducing discrepancies.

Aerospace Technician, GKN Aerospace, Rotterdam, South Holland, Netherlands

MAY 2023 – MAR 2024

- Worked in the military sector, manufacturing precision components for aviation and aerospace under strict quality standards.
- Followed detailed technical drawings and work instructions, ensuring traceability and compliance with industry regulations.
- Signed a Non-Disclosure Agreement (NDA) and consistently maintained confidentiality and secure handling of sensitive information.

Laboratory Assistant, Eurofins, Barneveld, Gelderland, Netherlands

APR 2022 – APR 2023

- Supported laboratory testing activities with careful sample handling, preparation and documentation.
- Followed standard operating procedures and quality protocols to ensure accurate, reliable results.
- Gained experience working in a highly regulated environment with strong focus on data integrity.

Skills

Microsoft Power Apps & Power Automate

Microsoft Dataverse

Problem solving & analytical thinking

Complex Problem Solving Skills

Dedicated Team Player

Git & GitHub

REST API integration

Windows Server & Active Directory

Network & firewall basics (Fortinet)

SQL / Transact-SQL, Databases

C# / .NET

Unity 2D & 3D game development

Flutter & Dart

PHP & web application development

Languages

Romanian

English

Hungarian

Independent Game Developer, Career Break – Layoff/position eliminated, Oradea, Bihor, Romania

JUN 2020 – MAR 2022

- Developed 2D and 3D games using **Unity** and **C#**, focusing on procedural generation, environmental design and gameplay mechanics.
- Implemented gameplay systems, basic AI behaviour, UI, physics interactions and in-game tools, strengthening object-oriented programming skills.
- Built, tested and shipped prototypes on the Unity engine, learning version control, performance optimisation and cross-platform deployment.

System Administrator, WEBEYE Telematics , Oradea, Bihor, Romania (Hybrid)

APR 2019 – JUN 2020

- Oversaw IT operations for the Romanian branch, managing **Active Directory**, user accounts and Windows Server environments.
- Handled asset provisioning and security (ESET, firewall rules, secure file-sharing for employees and clients).
- Developed and automated internal processes to improve business efficiency and reduce manual administration.

Software Engineer, Celestica, Oradea, Bihor, Romania

FEB 2017 – APR 2019

- Maintained and developed internal applications using **C#**, **PHP** and **SQL**, supporting production and logistics operations.
- Built reporting dashboards, workflow automation tools and internal web interfaces handling large operational datasets.
- Designed relational database structures, optimised queries and worked closely with non-technical stakeholders to translate requirements into working software.

Education

MBO-equivalent in ICT (Computer Science Technician), Technical High School "Dimitrie Leonida", Oradea

SEPT 2008 – JUN 2012

- Vocational ICT program focused on computer systems, networks and software
- Studied programming fundamentals, databases and operating systems
- Gained practical skills in PC hardware, troubleshooting and basic networking
- Romanian diploma *Tehnician Informatic de Calcul* – equivalent to a Dutch MBO in ICT

Planned HBO ICT, Netherlands

2026 – 2030

- Planning to enroll in an HBO ICT bachelor with a specialization in Artificial Intelligence.
- Focus on data science, machine learning, intelligent systems and software engineering
- Goal: combine professional experience with academic training and graduate among the top students

Courses

**Microsoft – Querying Data with Transact-SQL 2016, Microsoft Partner -
Bucharest**

FEB 2019

Fortinet Network Security Training, Fortinet NSE Training Institute

MAY 2019
